25″ WALK-BEHIND BATTERY SWEEPER

Gladiator 464

Dustbane Gladiator 464 commercial sweeper, complete with AGM battery

Dustbane code 19677-C-AGM · base model 19677

A quiet, cordless sweeper that picks up dust and debris from a 25″ path in a single pass. It rolls from carpet onto hard floor with no adjustment, and the handle folds over so it stores in a closet.

- **Covers ground fast.** Dustbane rates it at 23,541 ft²/h at top speed, and says the Gladiator series works up to 10× faster than an upright vacuum.
- **Quiet enough to run while you're open.** Low-noise vacuum fans keep it at 56 dB, against 79 dB for a typical upright in Dustbane's own comparison.
- **Hard floor to carpet, no adjustments.** The self-levelling system keeps the brushes at constant pressure on any surface, into crevices and down into carpet pile.
- **Keeps its own filter clean.** An automatic shaker clears the 11 ft² filter, and there's a manual shaker on the control panel too.

Gladiator 464 with side brush and folding handle

25″	12k–16.4k	9.25 gal	2.5 h	84 lb
SWEEPING PATH	PRACTICAL OUTPUT	DEBRIS HOPPER	RUN TIME	MACHINE WEIGHT
64 cm per pass	ft²/h, NIKA estimate	35 L	12 V AGM, on board	38 kg, without battery

BUILT FOR THE WORK

Self-levelling brushes

Constant brush pressure on any surface. Go from a tiled lobby onto office carpet without stopping to adjust anything.

Folds for storage

The adjustable handle sets to the operator's height, then folds over the body for transport or a small closet.

Brushes in stock at NIKA

We carry the 464 main brush (3PMVVR0121) and side brush (3SPPV00303) in Guelph, so a worn brush doesn't park the machine.

SET IT FOR THE JOB, FROM THE HANDLE

Light sweeping mode

Up to 2.5 h

Everyday dust and grit on carpet and hard floor. Dustbane's run time applies to normal use.

Heavy sweeping mode

More power

For heavier soil. Expect a shorter run time; Dustbane doesn't publish a figure for this mode.

Filter shaker + fan switch

On the panel

Shake the filter on demand and switch the vacuum fan on or off from the same panel, with a battery-level display.

Book a demo on your own floor.

We'll bring the Gladiator 464 to your site and run it on your floors.

Specifications from Dustbane Products Ltd.: product page, Gladiator 464 spec sheet and Gladiator 464/664 brochure (Nov 2026). Productivity: 23,541 ft²/h (2,187 m²/h) is Dustbane's theoretical rating at maximum speed. The practical estimate is a Nika Sales calculation: 0.635 m path × 2,500–3,000 m/h × 70–80% efficiency. Real coverage depends on soil load, layout and operator. "Up to 10× faster than an upright vacuum" is Dustbane's claim. Subject to change without notice. Nika Sales · Rev. 2026-11-12 ·

SPECIFICATIONS

PERFORMANCE	
Productivity (theoretical)	23,541 ft²/h (2,187 m²/h)
Practical coverage (est.)	≈ 12,000–16,400 ft²/h (1,110–1,520 m²/h)
Sweeping width	25″ (64 cm)
Maximum speed	3.5 km/h (≈ 2.2 mph)
Maximum slope	2%
BRUSHES & FILTRATION	
Main brush	18″ (46 cm)
Filter surface area	11 ft² (1 m²)
Filter shaker	Automatic, plus manual shaker
Hopper capacity	9.25 US gal (35 L)
POWER	
Power supply	12 V battery, AGM (sealed) in the -C-AGM package
Charger	On board
Run time	2.5 h
MACHINE	
Weight (without battery)	84 lb (38 kg)
Overall size	24 × 39 × 41″ (61 × 99 × 104 cm), as listed by Dustbane
Body construction	Rotational-moulded polypropylene
Noise level	56 dB
Certification	ETL listed (Intertek)

SUPPLIED WITH

- ✓ Main brush and side brush
- ✓ Panel filter with automatic shaker
- ✓ 12 V AGM battery (-C-AGM package)
- ✓ On-board charger
- ✓ Folding, height-adjustable handle
- ✓ Digital hour meter

464 or 664?

Same body design, filter and controls. The **464** sweeps 25″ and fits narrower aisles and doorways. The **664** sweeps 32½″ with a bigger 11.9 gal hopper and 3 h run time, for larger open floors.

Sweeper or vacuum?

An upright covers one narrow strip at a time, on a cord. The 464 sweeps a 25″ path on battery. Dustbane puts an upright at about 3,000 ft²/h. Keep the upright for detail work.

What it really covers

Plan on ≈ 12,000–16,400 ft²/h once you add turns, emptying and edges. A 30,000 ft² floor works out to about 1¾–2½ hours, inside one charge in light mode.

DUSTBANE WARRANTY · GLADIATOR SERIES

10 yr	3 yr	3 yr	1 yr	1 yr
Polyethylene tanks	Major electrical components	Fan & brush motors (or 2,000 h)	Labour at an authorized service centre; wheels & casters	Battery & charger, pro-rated; travel 90 days

WHERE IT FITS

Hotels & conference
Ballrooms, meeting rooms and hallways between events.

Retail & malls
Sales floors and back rooms before opening.

Offices & banks
Carpet and hard floor in one pass, during the day.

Schools & healthcare
Hallways, gyms and entrance matting.

BEFORE YOU ORDER

1. **Measure your narrowest door.** Dustbane lists the machine at 24 × 39 × 41″. We'll confirm which figure is the width before delivery.
2. **Plan for the battery weight.** 84 lb is the dry machine. The AGM battery adds to that, so plan two people for a tailgate lift.
3. **Keep it on the flat.** It's rated for slopes up to 2%. Ramps and loading-dock plates are a job for a larger sweeper.
4. **Order spare brushes with it.** Brushes and filters are wear items, not warranty. We stock the 464 main and side brushes.

Ask about a demo. We service what we sell.
Brushes, filters, batteries and repairs from our Guelph shop.

Sources: Dustbane product page, Gladiator 464 spec sheet and Gladiator 464/664 brochure (Nov 2026); warranty per Dustbane's Gladiator series policy (wear items such as brushes, filters, switches and gaskets are excluded). Dustbane's brochure comparison chart shows 21,500 ft²/h for the 464; its spec table shows 23,541 ft²/h, which matches 2,187 m²/h, and that figure is used here. The spec sheet lists the charger as "N/A"; the brochure lists "Onboard". Battery capacity (Ah) is not published by Dustbane; confirm at order. Metric conversions approximate.
