21″ WALK-BEHIND AUTO-SCRUBBER

Labrador L21

Traction Auto-Scrubber

Traction drive · 24 V AGM · 56/54 dB in ECOSELECT

Dustbane code **19371-C-AGM** · Labrador L21 Traction Complete AGM

A 21-inch scrubber quiet enough to run while the building is open. ECOSELECT mode drops it to 56/54 dB and stretches the battery to a 3.5-hour shift, so the floors get done on days, not on a night-shift premium.

- **Clean during business hours.** 56/54 dB in ECOSELECT is quiet enough for a school corridor, a clinic waiting room or a store aisle mid-shift.
- **A full shift on one charge.** Up to 3.5 hours in ECOSELECT on 24 V AGM, with the charger built into the machine — nothing extra to find room for.
- **Traction drive does the walking.** 503 lb of machine moves itself at up to 3.5 km/h; the operator steers instead of shoving.
- **Dries behind itself.** A 32″ parabolic squeegee and 48.5″ of water lift leave floors walk-on dry — and the blade turns four times before you replace it.

21″	3.5 hr	13 gal	56/54 dB	503 lb
SCRUB PATH	RUNTIME	SOLUTION TANK	NOISE	WEIGHT
53 cm	ECOSELECT mode	51 L · 14 gal recovery	ECOSELECT mode	228 kg with batteries

One-knob control
Backlit display and a single selector — an operator learns it in a shift, not a week.

13 / 14 gal tanks
Wide-open recovery tank rinses out in seconds, so nothing sours overnight.

24 V AGM, charger on board
Two sealed 12 V batteries and a protected built-in charger. Plug into any outlet.

32″ parabolic squeegee
Eleven inches wider than the scrub path — it catches what the brush throws.

WHERE IT EARNS ITS KEEP

Schools & daycare
Quiet enough to run between classes instead of paying an evening crew.

Healthcare & LTC
Low noise near patient rooms; walk-on-dry floors cut slip risk.

Retail & grocery
Clean aisles mid-trade. 21″ fits between racking and end caps.

Light industrial
Lunchrooms, corridors and production aisles a rider can't reach.

Quotes, demos and same-week service.
Guelph-based. We sell it, we stock the parts, and we fix it.

 Specifications reproduced from Dustbane literature; subject to change without notice. Productivity figures are either manufacturer ratings or clearly labelled estimates; actual coverage varies with soil load, floor layout and operator.

FACTORY SPECIFICATIONS

CLEANING	
Scrubbing width	**21 in** (53 cm)
Squeegee width	**32 in** (81.5 cm)
Brushes	**1 × 21 in** (1 × 53 cm)
Brush / pad speed	**150 RPM**
Brush pressure	**58 lb**
Water lift at squeegee	**48.5 in** (123 cm)
Productivity	**31,372 ft²/h** (2,915 m²/h) theoretical at maximum speed
POWER & DRIVE	
Power supply	**24 V** (2 × 12 V AGM)
Brush motor	**400 W**
Vacuum motor	**2-stage, 480 W**
Traction motor	**Yes**
Maximum speed	**3.5 km/h** (2.2 mph)
Maximum slope	**2%**
Runtime	**Up to 3.5 hr** (ECOSELECT mode)
TANKS, SIZE & NOISE	
Solution tank	**13 gal** (51 L)
Recovery tank	**14 gal** (53 L)
Machine size (L×W×H)	**40 × 20 × 38 in** (102 × 51 × 97 cm)
Weight with batteries	**503 lb** (228 kg)
Noise level	**56/54 dB** (ECOSELECT mode)
APPROVALS	
Certifications	**CE · cUL** Supports LEED / LEED-EB and WELL programs
Order code	**19371-C-AGM**

SUPPLIED WITH

- DBX-Power AGM batteries, 2 × 12 V
- Integrated on-board charger, covered and protected
- Drive pad (pad driver) — standard on Dustbane auto-scrubbers
- 32″ parabolic squeegee assembly
- Self-levelling scrub head

What it really covers

Dustbane rates the L21 at **31,372 ft²/h theoretical at maximum speed**. **Our working estimate is 10,000–13,800 ft²/h (930–1,280 m²/h)** — a 21″ path at a realistic 2.5–3.0 km/h with 70–80% coverage after turns, edges and refills. Estimate, not a manufacturer rating. Size the machine on this number, not the headline.

The tank runs out before the battery

3.5 hours of charge against a 13-gallon solution tank means your refill point, not the battery, sets the route. Plan a fill-and-dump station near the middle of the run and the machine will use the whole shift.

ECOSELECT is the reason to buy it

Dustbane rates ECOSELECT at up to 20% more runtime and 56/54 dB. That's what lets a daytime crew scrub a corridor while the building is occupied — and daytime labour is cheaper than a night shift.

If the L21 is too small

Same Labrador platform in 24″ (L24, 35,693 ft²/h) and 28″ (L28, 40,547 ft²/h), both with a higher 4.5 km/h top speed. The step up is worth it above roughly 40,000 ft² per shift — ask us to price both.

Parts and service from Guelph

We stock pads, squeegee blades and wear parts and we service what we sell. Warranty labour goes through an authorized Dustbane service centre — that's us.

WARRANTY — AS PUBLISHED BY DUSTBANE

3 yr
Major components — electrical, brush and vacuum motors, transmissions. Or 2,000 hours, whichever comes first.

10 yr
Polyethylene tanks against defects in material and workmanship.

1 yr
All other components, and labour through authorized Dustbane service centres.

1 yr
Batteries and chargers, pro-rated, with documented maintenance.

Excludes normal wear items — belts, brushes, pads, filters and squeegee blades — plus misuse and non-approved parts. Full terms at dustbane.ca.

BEFORE YOU ORDER — FOUR THINGS WORTH CHECKING

Doorways and elevators
20″ wide, 40″ long, 38″ tall. Tighter than most 21″ machines, but measure the narrowest door on the route.

Ramps and docks
Rated to a 2% slope. A loading dock ramp or a parkade incline is outside spec — check the route.

Fill and dump point
13 gal in, 14 gal out. A sink or floor drain within the route beats walking the machine back.

Pads and blades on hand
21″ pads and squeegee blades are wear items, not warranty. Order a starter set with the machine.

Ready to see one run on your floor?
Book an on-site demo, or ask for a written quote the same day.

Specifications reproduced from Dustbane literature — product page dustbane.ca/products/labrador-l21 and spec sheet “Labrador-L21-en”, retrieved 22 September 2026. Where the two disagree the product page is used; Dustbane’s printed spec sheet gives the scrub width as 51 cm, which does not match 21 in. Certifications as listed on Dustbane’s product page; the printed spec sheet shows “Approval(s): N/A” — confirm with Dustbane before relying on them in a tender. Productivity figures marked as estimates are modelled, not manufacturer ratings, and vary with soil load, layout and operator. Battery, charger and pad-driver inclusion reflects Dustbane’s “Complete AGM” configuration — confirm on the order. DUSTBANE®, Labrador™ and ECOSELECT are trademarks of Dustbane Products Ltd. Specifications subject to change without notice.
