22″ Battery Auto Scrubber

Johnny Vac JVC56BN — battery, charger & brush included

Model JVC56BN · UPC 628383475774

Scrub, rinse and dry in a single pass. A 22″ disc deck and 13-gallon tanks on both sides, in a simple push-style machine with no drive system to learn or maintain. The floor is dry enough to walk on right behind the operator.

- **Simple to run.** Key switch, a few switches and a battery meter with an hour counter. New staff are scrubbing within minutes.
- **Fewer trips to the sink.** 50 L solution and 50 L recovery tanks give a 22″ machine plenty of capacity.
- **Dry, streak-free finish.** A 34″ curved squeegee and a 450 W vacuum motor pull water off tile and sealed concrete in one pass.
- **Ready to work out of the crate.** Two 105 Ah batteries, smart charger, brush and pad holder are in the box.

560 mm disc deck	estimate · see p.2	50 L each tank	24 V · 2 × 105 Ah	144 kg with batteries

BUILT FOR THE PEOPLE WHO RUN IT

Simple, keyed controls

Key switch, brush switch, a water-flow dial, and a battery meter with an hour counter. Easy to train on, easy to log labour hours.

Four-edge squeegee

The curved 34″ squeegee uses blades you can flip to all four edges before you replace them.

Tool-free brush change

The brush or pad holder goes on and off without tools. Scrub with a brush, or run pads for maintenance and polish.

Longer motor life

Separate intake and exhaust air ducts keep hot and cool air apart, so the motors run cooler and last longer.

WHERE IT EARNS ITS KEEP

Retail & grocery
Aisles, back rooms and entrances. Scrub and dry before you open, or between rushes.

Schools & offices
Corridors, cafeterias and lunchrooms, where floors must be dry and safe right away.

Clinics & care homes
Published at 58 dB, quiet enough to clean while people are around.

Shops & small warehouses
Sealed concrete on level floors, with open runs and entrance grime.

See it on your floor.

Book an on-site demo on your own floors. We'll help you size the machine to your square footage before you buy.

Specifications as published by Johnny Vac and cross-checked against the manufacturer's data; subject to change without notice. Practical output is a Nika Sales estimate, not a manufacturer rating. Actual coverage varies with soil load, floor layout and operator. Full specifications on page 2. Nika Sales · Rev. 2026-11-20 · Page 1 of 2

TECHNICAL SPECIFICATIONS

CLEANING	
Cleaning path	22″ (560 mm), single disc
Squeegee width	34″ (864 mm), curved, four-edge blades
Brush motor	550 W, 24 V DC
Vacuum motor	450 W, 24 V DC
Rated productivity	Up to 20,990 ft²/h (1,950 m²/h)
Practical output (estimate)	**≈ 10,500–14,500 ft²/h (980–1,340 m²/h)**
Sound level	58 dB (as published)
TANKS	
Solution tank	13.2 US gal (50 L)
Recovery tank	13.2 US gal (50 L)
DRIVE & POWER	
Drive	Push (manual), no drive motor
Batteries (included)	2 × 12 V, 105 Ah, sealed maintenance-free (24 V)
Runtime	Up to 3 h per charge
Charger (included)	24 V / 15 A automatic, off-board; 120 V outlet
Charging time	Approx. 6 h
SIZE & WEIGHT	
Machine body (L × W × H)	49.2 × 22.8 × 38.6 in (1250 × 580 × 980 mm)
Weight	317 lb (144 kg) with batteries · 170 lb (77 kg) without
Wheels	Non-marking
Warranty	2 years machine · 6 months batteries

SUPPLIED WITH

- ✔ 2 × 12 V 105 Ah batteries (24 V) + cables
- ✔ 24 V / 15 A intelligent charger
- ✔ Scrub brush for the 22″ deck
- ✔ Pad holder
- ✔ 34″ (864 mm) squeegee assembly
- ✔ Ignition key

One charge, one shift

At the practical rate, three hours of runtime covers roughly 31,500–43,000 ft² of floor per charge (estimate). Charge it overnight and it's ready in the morning.

Push or traction?

With no drive motor, there is less to service and the price is lower. It suits level floors and moderate runs. For ramps or long corridors, ask about the self-propelled JVC56BTN on the same 22″ platform.

Brush or pad: your call

Use the brush for grouted tile and textured concrete. Switch to the pad holder for sealed VCT and polished floors.

BEFORE YOU ORDER: A 2-MINUTE CHECKLIST

1. **Measure your doorways.** The 34″ squeegee is the widest part. Check doors, elevators and aisles on the cleaning route.
2. **Plan the charging spot.** You need a standard 120 V outlet in a ventilated area, with room to open the recovery tank lid while it charges.
3. **Allow 6 hours to charge.** Overnight charging suits a single shift. Back-to-back shifts need a plan.
4. **Check for ramps.** The operator pushes 317 lb. Level floors are fine. Long slopes are a reason to choose the traction model.
5. **Use low-foam chemistry.** Foaming detergent can reach the vacuum motor. Ask us for compatible auto-scrubber cleaners.
6. **Plan delivery.** At 317 lb with batteries, use a ramp or liftgate, not a two-person lift.

PARTS & CONSUMABLES

Part no.	Description	Part no.	Description
`CHARG24JVC`	Replacement charger, 24 V / 15 A	`BATT12JVC50`	Replacement battery, 12 V 105 Ah (2 required)
`JVC00011`	Suction hose	`JVC00012`	Drain hose, 40″

○ White: polish · Red: light scrub · Blue: medium scrub · Green: heavy scrub · Black: strip

Floor pads, general guide. Grades vary by brand. Ask us for the right pad size for your pad holder.

Specifications as published by Johnny Vac (JVC56BN spec sheet and user guide) and cross-checked against the manufacturer's data; subject to change without notice. Weight is taken from the JVC56BN user guide and agrees with the manufacturer's figure; Johnny Vac's one-page spec sheet lists 330 lb (150 kg). Body dimensions exclude the squeegee. The sound level is the figure published for this model. Practical output assumes a working speed of 2,500–3,000 m/h at 70–80% efficiency. It is a Nika Sales estimate, not a manufacturer rating, and actual coverage varies with soil load, floor layout and operator. Warranty terms are as published by Johnny Vac; confirm current terms at the time of quote. Johnny Vac is a trademark of its owner. Nika Sales · Rev. 2026-11-20 · Page 2 of 2
